

WE'RE HEADING SOUTH FOR 2026

The next chapter starts **now**.
See you in Orlando.

It has been an incredible two years having the city that never sleeps as the home for Fluttercon USA. After welcoming the flutter community with open arms in 2023, the world's leading Flutter developer conference series is packing its bags along with our friends from the Android community and heading south. droidcon NYC and Fluttercon USA will relocate to Orlando.

Looking ahead, the 2026 Orlando edition will set the stage for droidcon's next evolution — uniting Android, Flutter, React Native, iOS, and gaming developers under one roof in 2027. This new multi-platform format will build on the upcoming next.app devcon (Berlin, October 2026), where the next generation of mobile developer collaboration begins.

“

To our dear friends who joined, spoke, sponsored, and supported Fluttercon in New York — thank you for your dedication and belief in the power of community and connection. You helped shape something truly special.

The next chapter starts now.

— Greg Fawson, CEO
